I met with Dave Askanase yesterday and will be submitting a request for emergency order approval for C4 today. We should have approval sometime next week and C4 should be on site by the end of next week. C4 will start with the Lab Packs and continue working until \$40K is used. See Attachment.

Mickey:

I also forgot to ask you the status of the actions that C4 may be taking on behalf of the Estate. Please let me know the status.

Thanks

Mickey:

In the Wayland Warehouse there are some ceramic round objects. They appear to be catalysts. Do you have any information on these items?

Also, I am attaching the data from Dana's TCLP analyses.

In addition, we have gotten data back and the lab that we used Accutest had some difficulty with some of the matrices. In some instances they were unable to get detection limits that to determine if the waste was hazardous or not. We are looking at the totals data but that was really not much help because of the dilution that was determined necessary. Did you have any of these problems with your analyses?

Thanks
